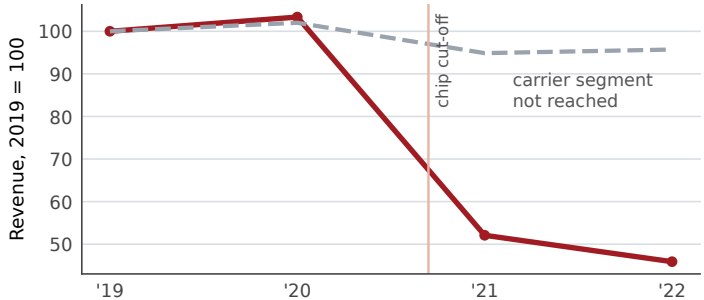
One control regime, four responses

Red: the targeted or domestic series. Grey dashed: the comparison series (navy solid: Huawei China revenue). Pink line: the rule that applied. The response follows from the input the rule reached and whether that input could be replaced.

No substitute

Cut off — Huawei

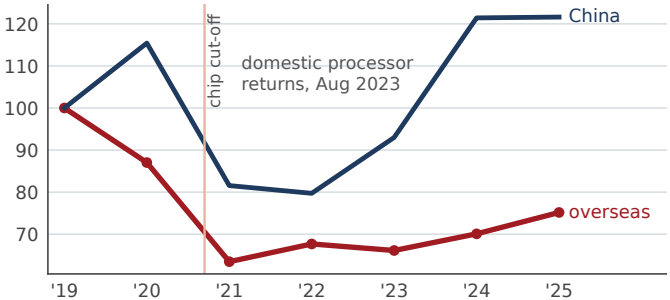
Frontier foundry reached by the rule; no substitute



Consumer −0.67 log vs carrier; group −42% vs 29 peers

Frozen abroad, revived at home — Huawei

Ecosystem access; replaceable at home only

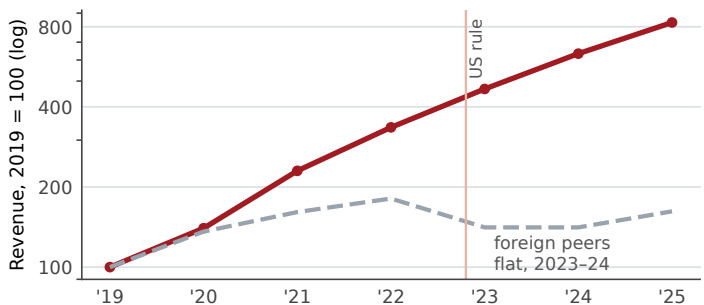


Overseas −25% vs 2019 (2025); China +22%

Substitute possible

Shielded substitution

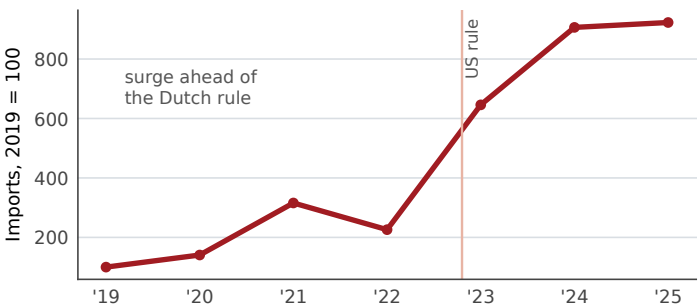
Mature tools; replaceable with time and state capital



Toolmakers 830 vs peers 162; domestic share of fab tools 10→30%

Beyond the law's reach

DUV lithography; the lead, not the law, sets the limit



Allied litho imports ×9.2, 2019–25;
no domestic immersion tool in production to 2025

Sources: Huawei annual reports 2019–2025 (segment revenue and revenue by region as first reported each year, CNY; carrier segment reported separately to 2022; overseas = total less China, including the Other region); quarterly revenue of NAURA, AMEC, ACM Research and the median of 15 foreign equipment and component suppliers (SEC EDGAR, OpenDART, cninfo; USD); GACC imports of HS 84862039 from the United States, Japan and the Netherlands.
