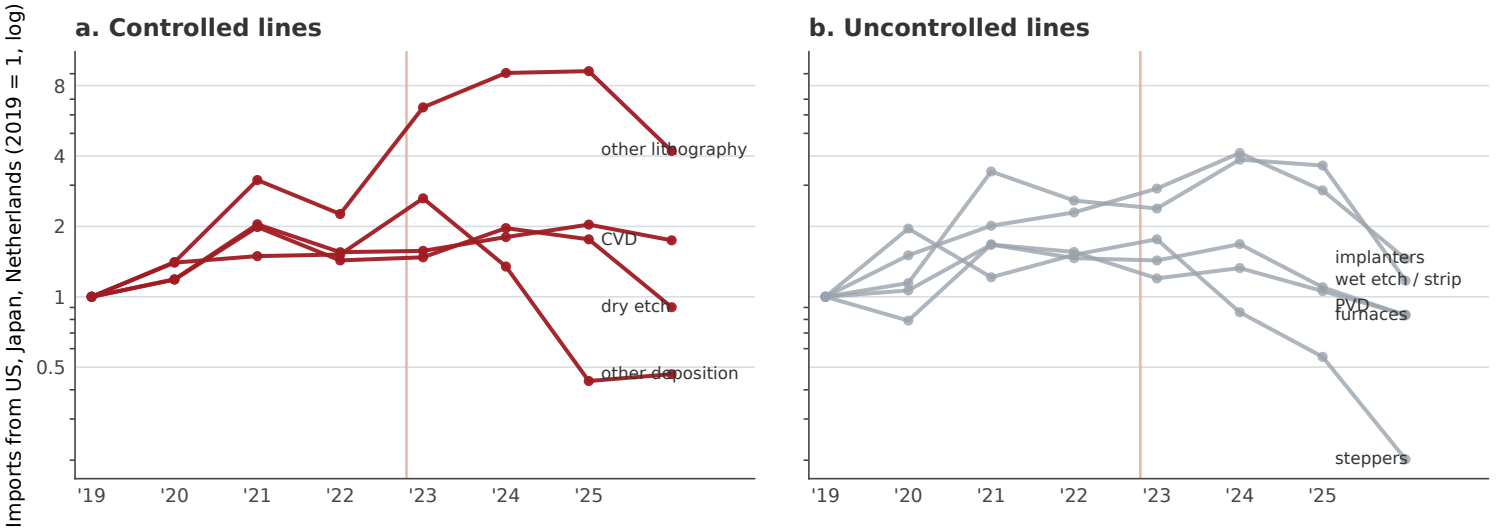
No compliance ladder at the tariff line either

Three of the four controlled tool categories rose at least as much as the uncontrolled ones after October 2022; the fourth, other deposition, is a small line (0.09 bn dollars in 2019) that fell. Shape tests on level, volatility and 2025 normalization are all insignificant (Appendix C).



Source: GACC HS8 monthly imports from the United States, Japan and the Netherlands, summed by year and indexed to 2019. Classification of lines in Appendix A; HS 84862090 (mixed) excluded. 2019 levels, USD bn: other lithography 1.08, CVD 0.59, dry etch 1.28, other deposition 0.09; furnaces 0.96, PVD 0.25, steppers 0.94, implanters 0.39, wet etch/strip 0.24.
