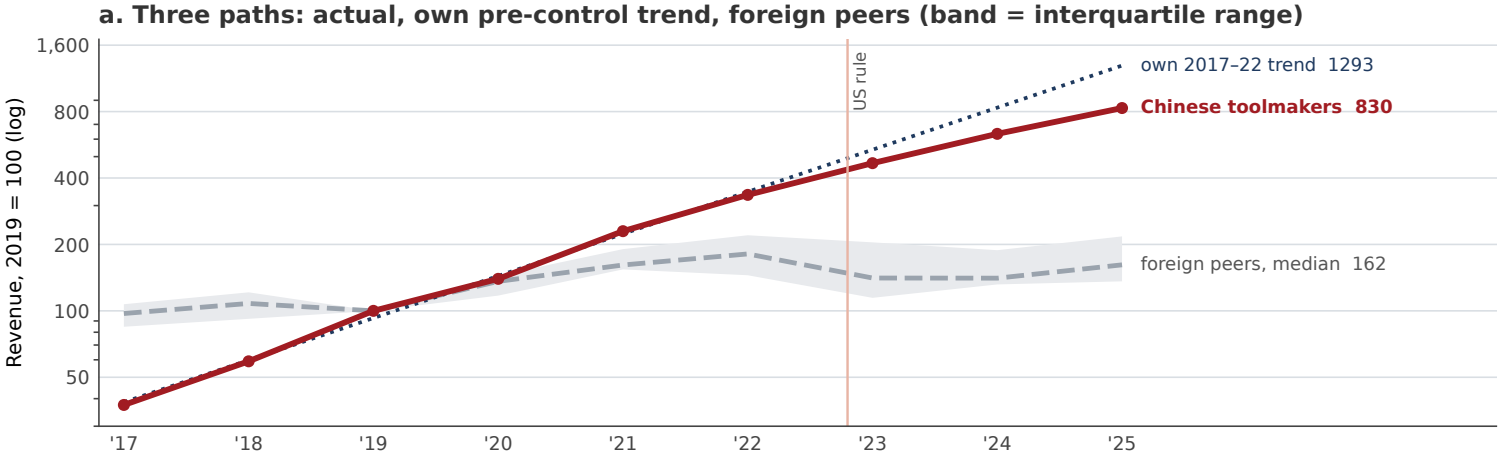
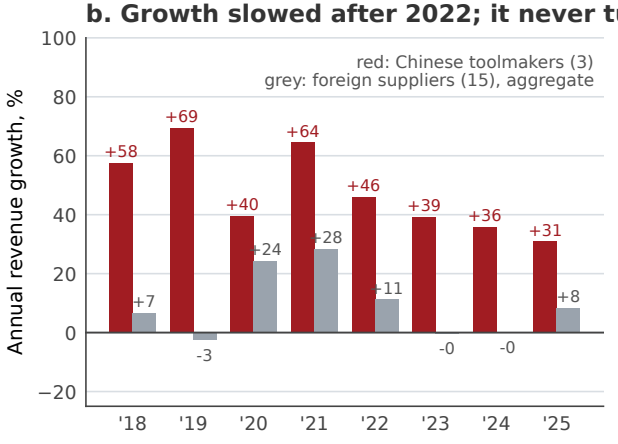
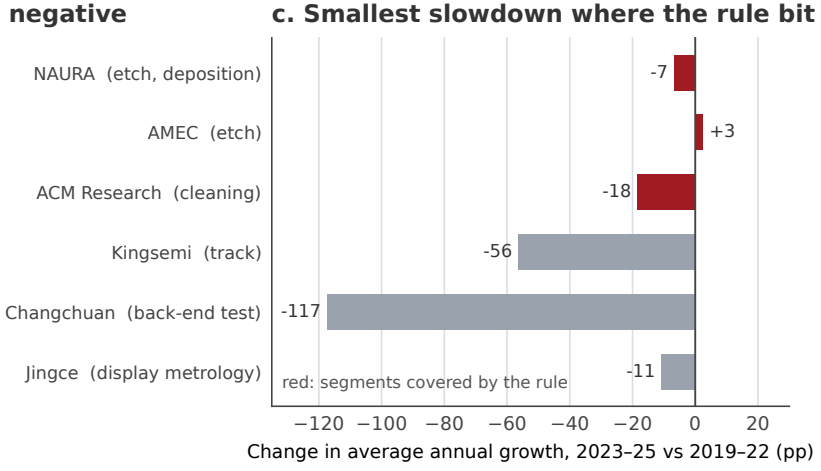
Shielded substitution: domestic toolmakers slowed, foreign peers stalled

Revenue of NAURA, AMEC and ACM Research against two counterfactuals: the median of fifteen foreign equipment and equipment-component suppliers and their own 2017–2022 trend. Growth after the October 2022 rule stayed below the pre-control trend but, unlike foreign peers, never turned negative; the slowdown was smallest in the segments the rule covered.







Sources: audited annual revenue in USD, sums of quarters (cninfo, SEC EDGAR, OpenDART); annual reports for panel c (cninfo). Foreign suppliers: Applied Materials, KLA, Teradyne, Axcelis, Advanced Energy, Entegris, FormFactor, Ichor, Kulicke & Soffa, MKS, Onto, Eugene Technology, Jusung, TES, Wonik IPS. Own trend: log-linear fit 2017–2022, extrapolated. Changchuan in panel c uses the one comparable post-2022 year; the AMEC pre-period covers 2020–22 (data from 2019).
