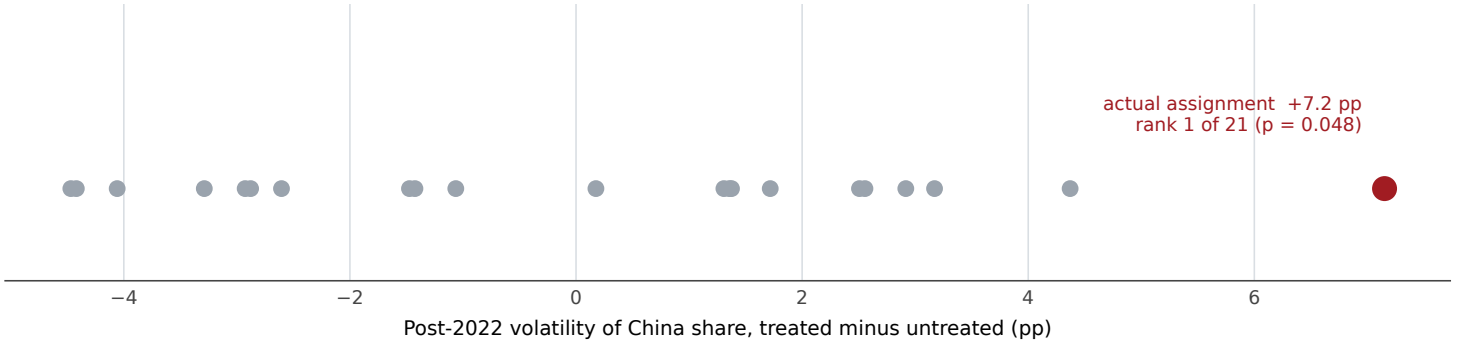
The compliance cycle is the largest of all 21 possible assignments

Each dot is the volatility statistic for one choice of five "controlled" vendors among seven (AMAT, KLA, Lam, Tokyo Electron, SCREEN, DISCO, ULVAC). The true assignment sits at the extreme.



Sources: SEC 10-K and EDINET annual China revenue shares, 2018–2026 (AMAT through FY2025). Statistic: standard deviation of annual changes from 2022 onward, treated mean minus untreated mean. Firm-level, pp: TEL 12.9, Lam 11.3, SCREEN 11.2, KLA 10.7, AMAT 8.6; DISCO 4.6, ULVAC 2.9. Next-largest assignment 4.4.
